Mountain Weather Forecast

South Grampian and Southeast Highlands

Including South and East Cairngorms National Park, Aberdeenshire and Angus Hills, Ben Vrackie, Ben Lawers, Loch Tay and Ochils
Forecast valid from 06:00 on Friday 26 Nov 2021 until 23:59 on Saturday 27 Nov 2021

Forecast Issued on Friday 26 Nov 2021 at 03:23 by Met Office Aberdeen

Confidence: High for decidedly wintry conditions over the next couple of days and for a transition to less cold weather through early next week. Some uncertainty in the details of snowfall on Friday, however.

Headline for Friday 26 Nov 2021: Winter conditions. Bitterly cold, frequent snowfall and dangerous winds.

Mountain weather hazards on Friday 26 Nov 2021

Blizzards High Likelihood	**Heavy Snow** Medium Likelihood	**Storm force winds** High Likelihood
Gales High Likelihood	**Severe chill effect** High Likelihood	**Poor visibility** High Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Forecast for Friday 26 Nov 2021

Weather: Cold northwest winds will bring frequent and heavy snow showers across all ranges through morning and these are likely to merge into several hours of snowfall through late afternoon and evening. Snow will fall across all areas above around 200-300m, with lower levels seeing rain, sleet or hail.

Chance of cloud free mountain/hill tops above 800m: 40% early and late, otherwise almost no chance.

Visibility: Fleeting cloud breaks through morning and later in the evening will afford some distant views of nearby ranges but otherwise, visibility will be highly variable. Passing snow showers, and later more persistent snowfall will lead to blizzard conditions and almost no visibility. Cloud bases as low as 300m at times, and widely extensive above 500m from late morning. Cloud breaking through evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Serious winter conditions. Wind speeds up to 90mph are possible on the most exposed ground later in the day. Mean speeds shown at 300m and below look too low by 10-20mph.

Forecast for Saturday 27 Nov 2021

Weather: A cold, snowy start across the north, but clearer and frosty in the south. Northerly winds continue to feed very cold air southwards, with snow showers developing across mainly the northern ranges, but with some longer bright or sunny spells between these. Strong winds will slowly ease through afternoon and showers will become isolated through evening. Best shelter towards the Perthshire Hills. Snow will affect all levels.

Maximum wind: North 30-40 gusting 55mph initially, easing to 20-30 gusting 40mph through afternoon.

Chance of cloud free mountain/hill tops above 800m: 80% south, 30% north.

Visibility: Across the Cairngorms, Angus and Aberdeenshire Hills there will be large variation through the day as snow showers bring visibility down to near zero and areas of cloud descent to 200-400m, but these will pass quickly with decent break in between. Long bright or sunny spells in the south with only patches of cloud above 600m or so.

Temperature: **Glens:** Around freezing.
At 800m: Around minus 7 Celsius.
Freezing level: 100-200m.
